Xiao Cui 崔骁 is now is pursuing his PhD in Computer Science at Stony Brook University under the direction of Professor David Gu. In his own words: "Through studying computational conformal geometry, which I'm enthusiastic about, I hope to take a glimpse of the truth and beauty of math and the nature. On the other hand, I hope to produce algorithms and build big projects to change the world based on the math and engineering skills. I enjoy the whole process of learning, producing and realizing." We are happy to have him as a Mathcamp Coach for Computer Science this summer.
